**PROJECTS****My Portfolio Website:**

My personal website or portfolio that introduces me to potential employers. It showcases my works, tech stacks and all potential employers need to know about me and it will also allow them to

download my resume.

**Technologies Used** - HTML, CSS, JavaScript, etc.

**Link:** <https://ademolasodiq.netlify.app/>

#### **AfriKitchen Web App:**

A food order website application where a user can see the foods that the vendor has, displaying their names and price in naira.

Users can add food to cart, checkout, and make their orders after inputting their address in the delivery form.

**Technologies Used** - React.js, Redux, Modular CSS, JavaScript, and Firebase for backend support.

**Link:** <https://afri-kitchen.herokuapp.com/>

#### **Lottery Management System:**

A lottery management system that allows users to create an account, get account verification notification, get a generated raffle number after payment and also be able to view winning numbers.

**Technologies Used:** Node, JavaScript, Prisma, Paystack, TypeScript, Express Framework, React.js, React Hooks, Redux, MySql.

**Link:** <https://rock-empire.netlify.app/>

#### **Redux Todo App:**

A todo app that allows users to store their todos and also set a reminder.

**Technologies Used** - React, modular CSS and redux.

**Link:** <https://gitfinder-context.netlify.app/>

#### **Add Meal Calories:**

A Web application that allows user to enter their food calories and calculate their calories intake

**Technologies Used** - ES6 Classes, Vanilla JavaScript (IIFE's), Dom Manipulation, Bootswatch/Bootstrap, etc

**Link:** <https://admolgit.github.io/mealcalories/>

**Easy-Contacts:**

A contact application that enables users to save their contacts on the cloud away from their devices.

**Technologies Used:** React, React Hooks, MongoDB, Nodejs with Express

**Link:** <https://eazyy-contacts.herokuapp.com/>

**Divisor Finder:**

Turned a simple divisor algorithm and data structure into a fully responsive divisor finder web application. The application helps get all the numbers that can divide any number entered by the user without remaining.

**Technologies Used** - Vanilla JavaScript, HTML 5 and CSS 3.

**Link:** <https://admolgit.github.io/Divisorfinder/>
